EDUCATION

Rutgers University

Bachelor of Science in Computer Science

Relevant Coursework: Data Structures, Data Management, Discrete Structures, Computer Architecture, Linear Algebra, Calculus I & II

New Brunswick, NJ

Sep. 2024 – May 2028

John P. Stevens High School

Relevant Coursework: AP Computer Science A, AP Computer Science Principles

Edison, NJ

Sep. 2020 – Jun. 2024

EXPERIENCE

CCS Materials Inc.

Data Analyst (Warehouse)

Edison, NJ

Jun. 2025 – Jul. 2025

- Monitored daily inbound/outbound shipment data and cross-referenced against system records to catch discrepancies before they impacted fulfillment.
- Digitized paper-based warehouse logs into internal tracking systems, cutting down manual lookup time and making records searchable across the team.
- Built weekly Excel reports with charts and summaries that gave supervisors a quick view of inventory trends and flagged recurring delay patterns.

Motate

Software Engineer

Remote

Feb. 2025 – May 2025

- Designed and implemented new features for a web-based analytics dashboard using JavaScript and React, focusing on clean data presentation and usable UI components.
- Leveraged OpenAI API to prototype automated reporting tools, reducing time spent on repetitive data-gathering tasks.
- Maintained technical documentation and used Git/GitHub (branches, pull requests, code reviews) to manage version control across a collaborative team.

PROJECTS

Inventory Trend Dashboard | Python, Pandas, Matplotlib

2025

- Built a Python script to ingest CSV-based inventory exports, clean malformed entries, and generate trend visualizations (weekly throughput, delay frequency) to support operational decisions.
- Automated report generation so that summary charts could be reproduced on new data without manual re-configuration.

Product Availability Tracker | Python, Requests, CSV

2024

- Wrote a Python script to periodically check product status from a webpage and log results to a CSV file, making it easy to review availability history over time.

CERTIFICATIONS

Intro to Cybersecurity – CodePath

IBM

May 2025

- Completed with honors; covered Linux CLI, SSH, networking exploits, social engineering (SET), malware detection, and digital privacy tools.

Machine Learning with Python

IBM

Oct. 2024

- Proficiency in supervised and unsupervised learning algorithms; developed Python programs for data analysis and visualization.

Mastercard Cybersecurity Virtual Experience Program (Forage)

Mastercard

Aug. 2024

- Served as a simulated analyst on Mastercard's Security Awareness Team; identified phishing threats and analyzed which business areas needed stronger security training.

TECHNICAL SKILLS

Languages: Python, SQL, Java, JavaScript, HTML/CSS

Data & Analysis: Pandas, NumPy, Matplotlib, Excel (pivot tables, charts, formulas), CSV/JSON processing

Frameworks / Web: React, Node.js (familiar), REST APIs

Developer Tools: Git/GitHub, Linux, Docker, Visual Studio Code, Cursor, Copilot

AI / Automation: OpenAI API (automation/prototyping), scikit-learn

Soft Skills: Data reporting, communication, documentation, attention to detail, time management, teamwork
